

Gurlivleen Singh Kainth

Full Stack Developer | GCP · Firebase · Node.js · Python | Melbourne, Australia

[+61 470 554 455](tel:+61470554455) | gurlivleen.kainth2000@gmail.com | [gurlivleen2000](#) (LinkedIn) | [gurlivleenkainth2000](#) (GitHub)

Work Rights: Subclass 485 Temporary Graduate Visa - full working rights, valid until February 2029

Profile

I build software that quietly does the heavy lifting — APIs that scale, dashboards that surface what matters, and integrations that turn manual work into automated workflows. Full Stack Software Developer with nearly 6 years of experience across Google Cloud Platform, Firebase, and modern JavaScript/TypeScript stacks. Proficient in Angular, Next.js, Node.js, FastAPI, and Spring Boot, with strong skills in REST API design, microservices, CI/CD, and Agile delivery. Recently integrated AI/ML services (Google Vision AI, OpenAI) into production workflows. Currently delivering backend services at WebAlive in Melbourne with full Australian working rights.

Technical Skills

- **Languages:** TypeScript, JavaScript, Python, Go, Java, Dart
- **Frontend:** Angular (NgRx, RxJS), Next.js (React Hooks, Context API), Flutter
- **Backend:** Node.js, Express.js, FastAPI, Flask, Spring Boot, Cloud Functions, Cloud Run, REST APIs, Microservices
- **Cloud Platforms:** Google Cloud Platform (Firestore, BigQuery, Cloud Storage, Compute Engine, VPC, IAM, Vision AI, Text-to-Speech), Firebase
- **Databases:** Firestore, BigQuery, MongoDB, MySQL
- **DevOps & CI/CD:** Docker, Terraform, GitHub Actions, Git, GitHub, Linux
- **Testing:** Playwright (E2E)
- **Methodologies:** Agile, Waterfall, Clean Architecture, Type-Safe Design, Git Branching Strategies

Professional Experience

WebAlive, Melbourne Australia

Software Developer | Professional Internship via ReadyGrad

Mar 2026 - May 2026

Responsibilities:

- Conducted R&D on containerised deployment for Exsited, building Docker Compose configurations as the foundation for a planned Terraform-based AWS production rollout.
- Designed Dockerfile build strategies for the Grails backend, ensuring reliable connectivity with containerised middleware services.
- Migrated multi-environment configurations (RabbitMQ, Redis, Elasticsearch, MariaDB) from production hosts to local Docker, supporting the containerisation R&D effort.
- Building Playwright E2E test automation for WebCommander, WebAlive's proprietary CMS platform, strengthening release confidence and reducing manual QA effort.

Auribises Technologies Pvt Ltd, India

Software Engineer (Full Stack)

Jul 2022 - Feb 2026

Responsibilities:

- Built and scaled full-stack features using Angular, Next.js, Node.js, and Python (FastAPI/Flask), improving system performance and reliability.
- Designed scalable APIs and serverless workflows using Google Cloud Functions, Cloud Run, and Firestore, reducing processing time by 30%.
- Developed real-time admin dashboards with Firestore listeners and reusable Next.js components, cutting manual monitoring by 50%.
- Integrated GCP services (Vision AI, Text-to-Speech, IAM, Cloud Storage) to improve automation accuracy by 40%.
- Managed CI/CD pipelines with Docker and GitHub Actions, improving deployment reliability by 35%.
- Collaborated across 10+ projects, following Git best practices and clean branching workflows.

Auribises Technologies Pvt Ltd, India

Junior Software Developer (Part-time)

Jan 2021 - Jun 2022

Responsibilities:

- Developed and maintained web applications using Angular and Firebase, delivering features on time and within scope.
- Worked closely with senior developers to implement UI components, backend logic, and Firebase integrations.
- Actively learned and applied new technologies through hands-on project work and internal training.

Auribises Technologies Pvt Ltd, India

Internship Trainee

Jul 2020 - Dec 2020

Responsibilities:

- Assisted senior developers with coding, testing, debugging, and documentation tasks.
- Gained practical experience in software development methodologies including Agile and Waterfall through team-based projects.

Projects

Finlo, India

A startup providing a SaaS solution for parking management. Finlo processes parking tickets using POS devices, accepts payments (cash and cashless), prevents revenue leakage, and monitors real-time transactions. Currently operational in 78 parking lots across 5 states, handling over 15,000 monthly financial interactions.

Mentcape, Germany

Led the development of an online therapy platform using Angular, Firebase, and Google Cloud Functions. Integrated CRM for therapist management, CMS for content delivery, appointment scheduling, dynamic email notifications, and automated invoice generation, creating a seamless experience for both patients and therapists.

Coupaso – AI-Powered Coupon Redemption & Receipt Analytics Platform (Germany)

Built an AI-powered coupon redemption and receipt analytics platform by designing ETL pipelines to sync Firestore data into BigQuery, integrating Google Vision AI for OCR and OpenAI for receipt validation and enrichment. Developed serverless backend workflows using Google Cloud Functions and built internal admin dashboards with Next.js and NextUI to support operational monitoring and business workflows.

Sail Simulation Race Display – Server-Side Component / Proxy

Master of Information Technology, Swinburne University of Technology

Developed a server-side proxy system to enable real-time sail simulation race visualisation by bridging legacy binary UDP/TCP telemetry with modern web dashboards. Designed a FastAPI-based backend to decode simulator data into structured JSON and stream it via WebSockets, using a modular and scalable architecture supporting session management, secure connections, and real-time monitoring.

Education

Master of Information Technology (Professional Computing) - Software Development (Specialisation)

Swinburne University of Technology, Melbourne, Australia

Feb 2024 - Dec 2025

Units: Software Development, Software Quality & Testing, Object-Oriented Programming, Web Application Development, Cloud Engineering, Big Data, Technology Application Project, Technology Design & Inquiry Projects.

Bachelor of Technology - Information Technology

Guru Nanak Dev Engineering College, Ludhiana, Punjab, India

Jun 2018 - Jul 2022
